MILANO – BRESCIA - VENEZIA

- ★ 20+ years leader company into the PDM/PLM industry
- ★ The most flexible product on the market
- ★ The most productive and user-friendly application
- ★ Customer's satisfaction as a priority
- ★ 100% compatible with all the SolidWorks releases

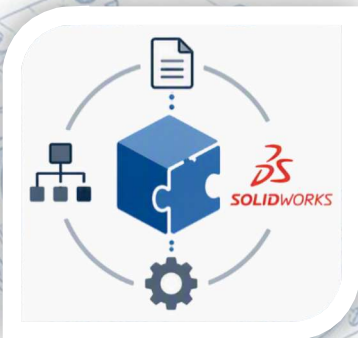

✓ FOCUS ON PROJECTS MANAGEMENT

For more than 20 years, MechWorks has been developing PDM/PLM vertical solutions for companies that design and produce. Thanks to the constant commitment to innovation and the continuous improvement of its platforms, MechWorks PDM became one of the most popular and acclaimed solutions on the market due to its reliability, completeness and integration level. The mission of MechWorks is to deliver advanced tools for product data management, offering a top-level solution for a fulfilling user experience.

✓ FOCUS ON THE PRODUCT INTEGRATION

MechWorks PDM guarantees a perfect integration with SolidWorks, allowing users to manage data, revisions and processes without interrupting their workflow. The solution uses the full functionality and the links between SolidWorks documents, including the most complex structures and relations. MechWorks PDM is integrated in the SolidWorks Task Pane and Feature Manager, becoming a reliable, powerful and intuitive tool that keeps the SolidWorks' typical user-friendly experience. This high level of integration dramatically reduces the manual and redundant activities, improving the efficiency and productivity of the whole product development process.
